

ABSTRACT

The present invention relates to a method of  
photographing the skin of a person comprising the steps  
of: (i) illuminating the skin with at least one light  
source, where the light emitted from the light source is  
filtered using a polarizing filter; and (ii) capturing  
the image of the illuminated skin with a camera; wherein  
the angle formed by the light source, the skin, and the  
camera is from about 35 degrees to about 55 degrees.
